Length with crane	518cm	17'
Column rise	33cm	1' 1"
Hydraulic stabilizing legs		
Hydraulic auto levelling column		
4x4		
Diff lock		

The Panagator will arrive at your location pre built with the 30ft Super Technocrane already fitted. Simply drive the whole thing out of the truck it arrives in, and then to your location, whether it be up hills, through muddy fields, or just a shoot where the crane has to be repositioned many times.

The Panagator has a very quick setup time therefore will save production time and money.
